

PrismAuditTM

A Virtualized Audit System for Your Wireless Networks

MANAGE YOUR NETWORK BY IMPROVING ITS SECURITY AND LOWERING ITS OPERATING COSTS

PrismAuditTM targets the use of lightweight Internet of Things (IoT)-based surveillance and remote monitoring applications in conjunction with an easy-to-use dashboard for managing and auditing users, spectrum and other transactions, and spectrum and network access. Application needs of the customer are tailored to serve the network owner's and user's specific auditing needs.

TRACKING ACCESS

PrismAuditTM monitors network access and intrusion from unauthorized users. The integrity and immutability of critical data are maintained throughout its operational lifetime, providing alerts whenever data are tampered with in any way.

GOVERNING YOUR NETWORK

PrismAuditTM affords the user the ability to manage and govern the flow of critical systems information across networks. Critical data is Blockchain secured via Distributed Ledger Technology (DLT) technology. Less important and temporary information is only retained for the shortest duration possible reducing network overhead.

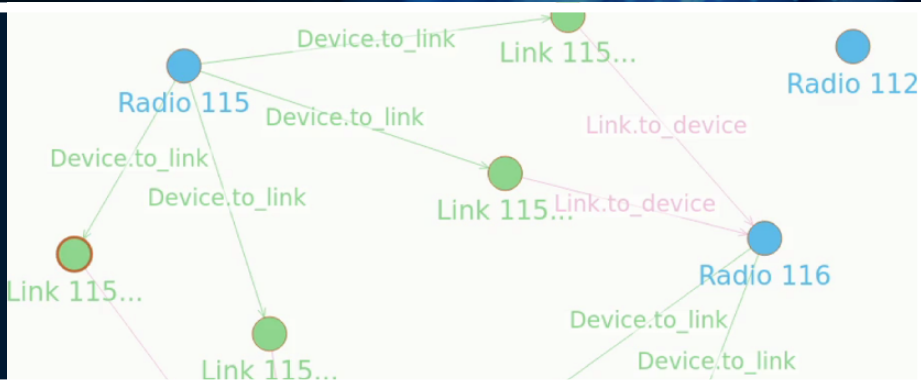

EASY TO USE

PrismAuditTM is readily installed onto a customer's network infrastructure. PrismAuditTM can operate on your business or enterprise network or as a virtualized service on a decentralized radio access network. Simply log in.

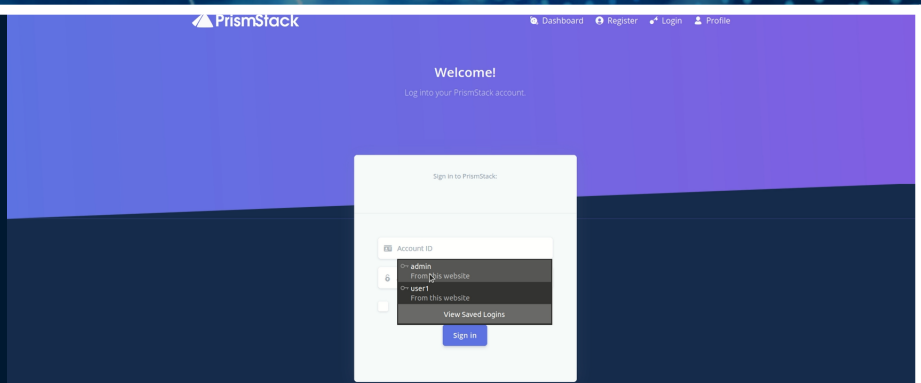

PROTECT AND AUDIT YOUR NETWORK IN 3 EASY STEPS

STEP 1:
Load PrismAudit™
on Your Network

STEP 2:
Log into
PrismAudit™
Subscription

STEP 3:
Take Control
